

MyCarParts®

MyCarParts Version 2.0

We want to help your business grow, which is why we include our eCatalog platform with any Evokat subscription. The new MyCarParts design is more modern, but the updates don't stop there.

MyCarParts data will be made available via secure web services to allow our partners to build their own eCatalogs and leverage their data like never before.

Rotating image sets are now supported. Product imagery has always been a critical component of presenting your products effectively, and Illumaware fully supports the growing use of these dynamic elements.

Linking to your preferred ecommerce solution is easier than ever. Purchase urls can be directed to go any platform.

This is just the beginning.

A MyCarParts site gives your customers, trading partners, and sales teams the freshest view of your critical catalog asset.
